

SOILPROM: two tools for smarter soil pollutant analysis

Modelling Platform (MP)

Access and use upgraded process-based models with step-by-step guidance.

Link and harmonize soil monitoring databases

Analyse transport and fate across soil, water, air and plants.

For scientists and specialists

Decision Support Tool (DST)

For practitioners and non-specialists

Choose relevant models for your question.

Clarify inputs and connect to trusted databases.

Guided parameter selection with sensible defaults.

Explore scenarios and compare options.

Understand and interpret results with confidence.

Data input

Collect and import your data

Scenario analysis

Test options and compare outcomes

Model selection

Pick the right models and databases

Outputs

View results in maps and charts

Recommendations

Make informed, actionable decisions

9 use cases, 6 countries
